

PROPOSED CLAIM - DO NOT ENTER INTO FILE WRAPPER

5. (Proposed Amendment) A service information distribution device for distributing service information to a personal digital assistant device, comprising:

- a management unit adapted to manage position information of positions that the personal digital assistant device has previously been located, as a position movement history;
- a selection unit adapted to select a personal digital assistant device to which the service information should be distributed on the basis of the position movement history managed by said management unit; and
- a distribution unit adapted to distribute the service information to the selected personal digital assistant device.
